CONGRATULATIONS
YOU OWN

A Memory Plus Recliner!

Power Recline Open Button - Push and hold to recline the seat. Release the button to stop.
Power Recline Close Button - Push and hold to move the seat back to the upright position. Release the button to stop.
Headrest Open Button - Push and hold to extend the headrest. Release the button to stop.
Headrest Close Button - Push and hold to retract the headrest. Release the button to stop.
Home Button - Push and hold to retract the headrest and move the seat back to the upright position. Release the button to stop.

Memory 1 Button and Memory 2 Button - Please see “Setting the Memory Position” section for operation.
USB Charging Port - Plug in a USB cable to provide up to 2.1A at 5VDC for recharging portable devices.

SETTING THE MEMORY POSITION:
1. Adjust the recline and headrest to the desired position.
2. Press and hold the desired memory button until the recline moves back and forth. Memory 1 will move back and forth 1 time and Memory 2 will move 2 times.

Recalling the Memory Position:
1. Press and release the desired memory button. The seat will recline and extend the headrest to the stored positions.

Memory Operating Notes:
For Safety reasons, the seat actuator will only move in the recline direction and the headrest actuator will only move in the extend direction when recalling memory position. If any actuator is already at or beyond the stored memory position, that actuator will not move.
